

IBRAHIM MERKEZ

Web Developer

EXPERIENCE

CRYPTO CURRENCY APP

Description:

| Developed a comprehensive cryptocurrency dashboard application to track real-time prices and historical data of various cryptocurrencies. Utilized Axios to fetch live data from a public cryptocurrency API and employed Tailwind CSS to design a clean, responsive, and visually appealing user interface. The application features real-time updates, price charts, and detailed coin information, providing users with an intuitive experience for monitoring their crypto investments.

THE ATOMIC BLOG

Description:

| Developed a blog application with React and useContext for global state management. Features include post creation, user authentication, and comment management, all presented in a responsive, user-friendly design.

SHOPPING CART

Description:

| Built a shopping cart app using useReducer and Context for state management. Features include dynamic cart updates, product management, and user interactions, all styled with a modern, responsive design.

GERMAN QUIZ

Description:

| Developed a quiz app using useReducer for state management, featuring dynamic question handling, scoring, and user feedback. The app provides an interactive and engaging experience with a clean, user-friendly interface.
